

LAUNCH A CHANNEL ANYTIME, ANYWHERE

The number of channels and of VOD content is increasing drastically, with the need to deliver in a quick, scalable and cost-effective way new linear programs as well as personalized OTT TV services. In front of this challenge, TITAN® Payout aims for bringing a new breed of IT-based payout solution, delivering a high level of scalability, availability and rendering. Its micro-service architecture allows defining flexible payout and asset management workflows, either in the ground or in the cloud, with permanent regard of easy-to-deploy, easy-to-operate and easy-to-monitor requirements.

TITAN® Payout can come with the ATEME compression services (namely TITAN Live), to offer a complete solution for channel origination and distribution over broadcast or OTT networks.

TITAN® Payout can address by this way a lot of applications, such as linear or popup channel origination, regionalization, disaster recovery. With powerful interfaces, it can easily integrate with any ecosystem, reducing time-to-market and OPEX.

KEY FEATURES

- Customizable channel payout workflows
- Uncompressed live feed playback
- Uncompressed video files playback
- Powerful graphic engine
- Easy-to-operate built-in automation
- Integrated media asset manager
- Record and time-delay capabilities
- Flexible Redundancy Scheme 1+1, N+1, N+M

VALUE-ADDED BENEFITS

- 
End-to-end Workflow
 Native interoperability with ATEME TITAN encoding solutions
- 
Flexibility
 Easy-to-deploy and easy-to-operate channel creation and manipulation
- 
Any Channel
 Linear and virtual programming
- 
Interoperability
 Easy integration into existing ecosystems
- 
Scalability
 Reduce data-center CAPEX with software only, high density solution
